Extending your family to include a new pet is life changing, here are some of our tips to keep them happy and healthy:

- Choose the right pet for your home
- Get a veterinary exam and know the signs of illness
- Book in and complete a registered microchipping
- Schedule vaccinations, worm and flea control and plans around "fixing"
- Plan socialisation with other animals
- Find the right food and feeding regime, ensure fresh and clean water is always available
- Make them a home and "gear up"
- Expect some messes and mistakes, so learn some training techniques - we're here to help.

Registered Microchipping

Includes implantation and registration of BackHome chip for identification.

Testing cows for liver fluke and worms

Organise bulk milk testing for liver fluke and ostertagia.

Talk to the team!

Milk quality

Bring milk samples in from your high cell count cows to find out what bacteria is the cause.

Or test on farm:
Mastatest SCC
\$24.08+GST

Talk to the team about getting your own Mastaplex G2 Lapbox to test on farm.

Vitamins

Prolaject B12 2000
500ml

NOW \$102.80+GST
Normally \$114.22+GST
ACVM Act 1997, No. A006536

10% off*

Keep your eyes peeled before your herd peels

Spore counts could be on the rise, this is where we see a higher prevalence of Facial Eczema. **Talk to the team about bringing in some grass samples for spore count testing.**

Filta Bac Cream
500g sunscreen

NOW \$69.20+GST
Normally \$76.95+GST
ACVM Act 1997, No. A002039

10% off*

Ask the team if zinc supplementation is right for you.

Did you know?

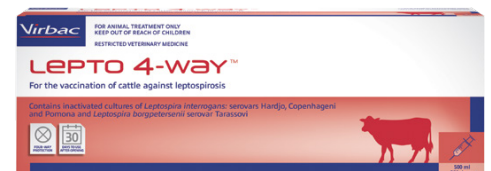

Protect your herd and your people against **Leptospirosis**. Leptospirosis is a bacterial disease affecting livestock and people. In cows, it causes mastitis, decreases milk production and can have severe implications for calves.

Ask the team about the new 4-way.
