DOGS WITH ALLERGIES

All dogs itch sometimes, but if your dog seems to scratch excessively, it could indicate a medical condition that needs attention.

Your vet will be able to determine if the itch is due to an infection, parasites, or skin allergies.

Common signs of skin allergies in dogs include:

- Frequent scratching, licking, biting, or chewing;
- Excessive rolling, rubbing, or scooting;
- Recurrent ear problems: head shaking, ear discharge, or scratching at the ears;
- Hair loss or body odour;
- Skin changes: rash, redness, greasy skin, or scabs.

If your dog's itching persists, or if they show any of the above signs, get in touch with us.

ALLERGY & IRRITATION TREATMENTS

If your dog suffers from persistent itch, they may be struggling with atopic or allergic dermatitis.

Talk to your vet for a diagnosis and treatment programme.

apoquel
chewable

Apoquel chewable tablet

Daily oral treatment.
